Rates are calculated by dividing the estimated number of crimes by the population, then multiplying by 100,000.

Percentages show the trend in estimated crime rate.

Estimated crime rates control for differences in population, therefore the counties are comparable.

Percentage changes are determined by subtracting the estimated crime rate in 1997 from the estimated crime rate in 2001, then dividing the total by the estimated crime rate in 1997.

Sources of data- Uniform Crime Reports- 1997 and 2001, U.S. Census Bureau- 2000.

Questions on this report can be directed to the Crime Analysis Unit at (517)322-5520.

Rates are calculated by dividing the estimated number of crimes by the population, then multiplying by 100,000.

Percentages show the trend in estimated crime rate.

Estimated crime rates control for differences in population, therefore the counties are comparable.

Percentage changes are determined by subtracting the estimated crime rate in 1997 from the estimated crime rate in 2001, then dividing the total by the estimated crime rate in 1997.

Sources of data- Uniform Crime Reports- 1997 and 2001, U.S. Census Bureau- 2000.

Questions on this report can be directed to the Crime Analysis Unit at (517)322-5520.

Topic: Violent Crime Trends

First District

Percentages show the five year trend in crime rate. Crime rates control for differences in population, therefore, the counties are comparable. Crime rates are determined by dividing the number of crimes by the population, then multiplying by 100,000. Percentage changes are determined by subtracting the number of crimes in 1997 from the number in 2001, then dividing the total by the number of crimes in 1997. Murder chart does not include counties with zero murders. Prepared by Wendy Easterbrook, Crime Analyst, (517) 322-5520, email: easterw@michigan.gov.

Percentages show the trend in estimated crime rate.

Estimated crime rates control for differences in population, therefore the counties are comparable.

Percentage changes are determined by subtracting the estimated crime rate in 1997 from the estimated crime rate in 2001, then dividing the total by the estimated crime rate in 1997.

Sources of data- Uniform Crime Reports- 1997 and 2001, U.S. Census Bureau- 2000.

Questions on this report can be directed to the Crime Analysis Unit at (517)322-5520.

Topic: Violent Crime Trends Sixth District

Murder Rates

Rape Rates

Percentages show the five year trend in crime rate. Crime rates control for differences in population, therefore, the counties are comparable. Crime rates are determined by dividing the number of crimes by the population, then multiplying by 100,000. Percentage changes are determined by subtracting the number of crimes in 1997 from the number in 2001, then dividing the total by the number of crimes in 1997. Murder chart does not include counties with zero murders. Prepared by Wendy Easterbrook, Crime Analyst, (517) 322-5520, email: easterw@michigan.gov.

Topic: Violent Crime Trends Sixth District

Robbery Rates

Aggravated Assault Rates

Percentages show the five year trend in crime rate. Crime rates control for differences in population, therefore, the counties are comparable. Crime rates are determined by dividing the number of crimes by the population, then multiplying by 100,000. Percentage changes are determined by subtracting the number of crimes in 1997 from the number in 2001, then dividing the total by the number of crimes in 1997. Murder chart does not include counties with zero murders. Prepared by Wendy Easterbrook, Crime Analyst, (517) 322-5520, email: easterw@michigan.gov.
